

IRI

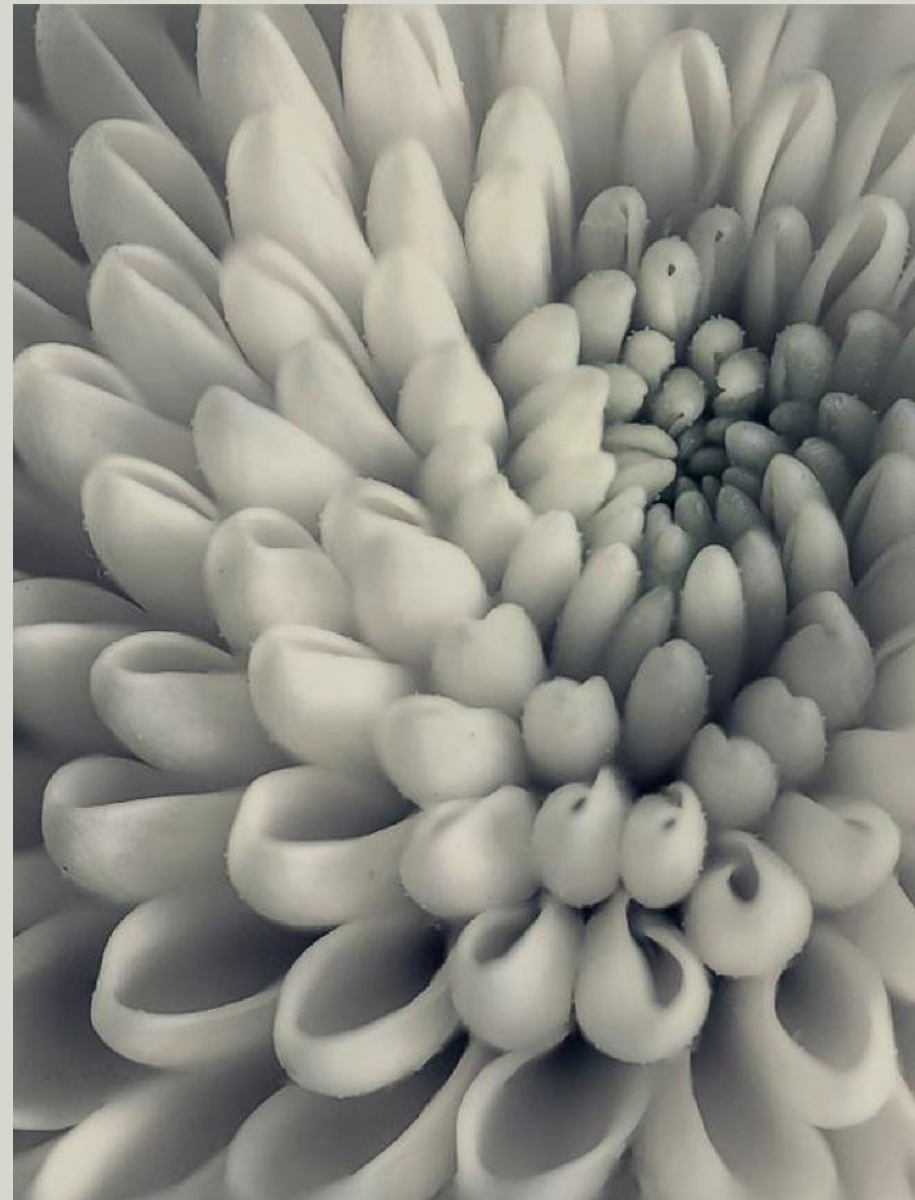

Innovative Work,
Humanitarian Heart

Ian Kellam, CADC III

About us

At Intelligence Renaissance Industries, we are redefining the How in addressing real life, big picture issues. By leveraging a vast network of researchers, our multidisciplinary team creates solutions for systemic issues in public health, environment, human trafficking, etc.

Problem

Improper Influence

The systems are broken, but those systems possess most of the influence.

Access

Solutions created by renown Doctors and Scientists are often overlooked due to lack of visibility.

Addressing Symptoms

The root causes needs to be addressed. Managing symptoms is proving to be ineffective long term.

Solutions

Change the How

Change how we look at autoimmune conditions, how we address public health issues, how we address human trafficking, how we use data.

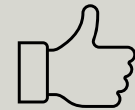

Target Research

Countless solutions are based in already existing research contained within our network.

Wellness Focused

Use innovative solutions to improve health, wellness, and integration in our society.

Implement

Several programs are ready to be implemented and can effectively scale within the next 12 months.

Program Overview

Unique

Programs related to health, STEM, humanitarian efforts, and the environment.

Deeply Impactful

8 Programs specifically targeting systemic issues that are largely connected.

Tested

Research has been conducted by researchers in the TETRAD network.

Authentic

Changing How we approach these issues can have far reaching benefits for people all over the world.

Program benefits

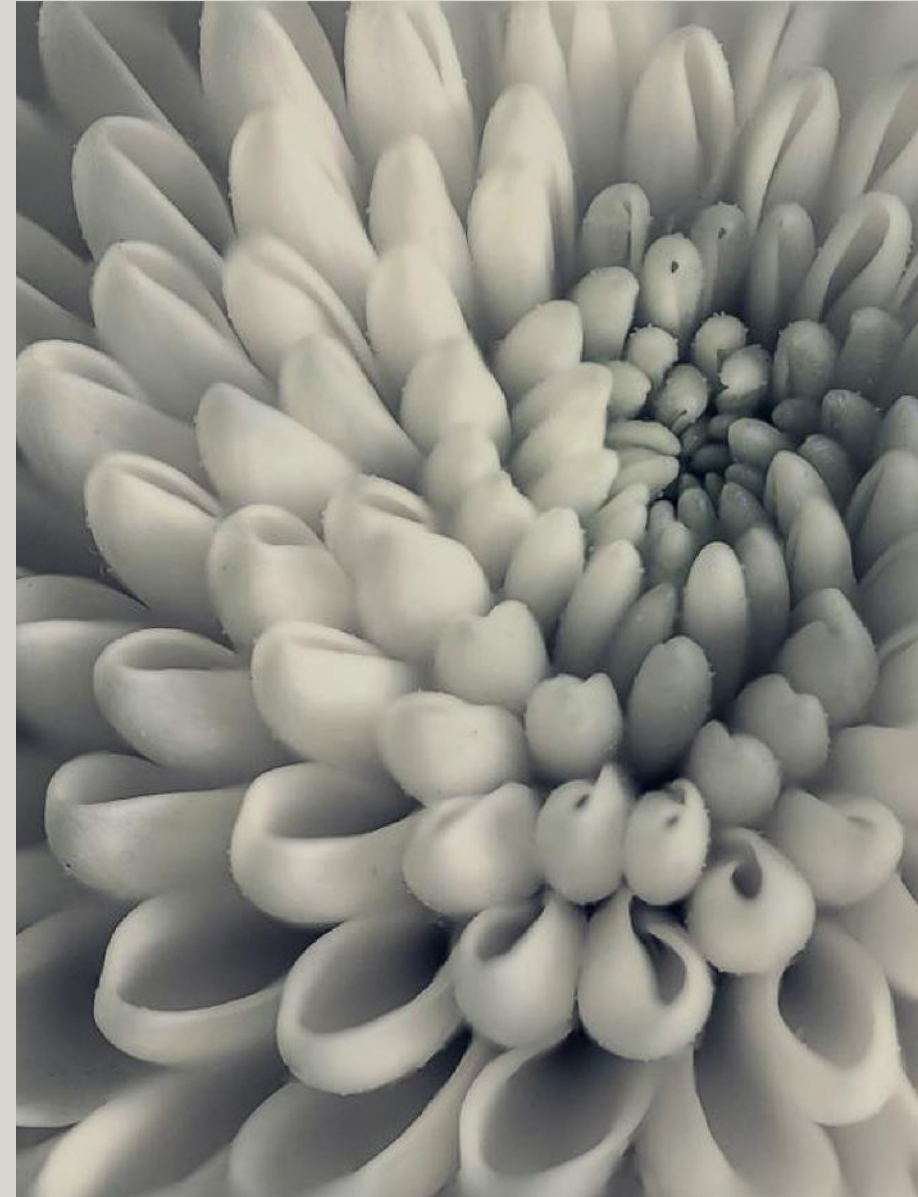

- Let's talk Autoimmune Disease and Population Health Data
- 1 of our 8 programs, Gaia Oasis, uses psychosocial wellness as the main pathway to getting a better handle on causes of diseases related to neuro-, cardio-, autoimmune-
- 3 major gains for the medical community: (1) Public Health Data Resources,
- (2) Better and earlier diagnosis along with (3) effective, less invasive, therapeutics will save lives

Gaia Oasis

Integrating advanced biotechnologies, diagnostics, and therapeutics is the most effective, holistic approach to psychosocial wellness. There are critical roles of both quantum biology and therapeutic modalities in addressing the root causes of the "neuroplex" diseases keeping our society sick.

Financial Goals: Gaia Oasis

- Initial contributions of \$1 million annually to provide PHIBER (public health) data.
- After 1-3 years, revenue created from PHIBER data will be \$50+ million, including clinical trials in the pharmaceutical and healthcare space.
- After scaling the program, annual costs are estimated at \$2-\$4 million
- Implementation of diagnostic advancements and therapeutics will follow

A background illustration of several long, slender leaves with fine, parallel lines representing veins. The leaves are rendered in a light gray tone against a darker gray background, creating a subtle, organic pattern.

Company Overview

Business model

Science and Technology

Utilizing research backed solutions for the benefit of us all.

Business and Capital

IRI products and solutions effectively address societal issues while fueling further research

Human Life and Society

Save lives, improve population wellness

Growth strategy

February
2023

Roll out funded programs to high profile or top-level participants to help establish the solutions

May
2023

Release the programs to other relevant participants and monitor press release and social media accounts

October
2023

Gather feedback and adjust approaches as necessary

Central Executive Committee

Dr. Martin
Dudziak, PHD

CEO

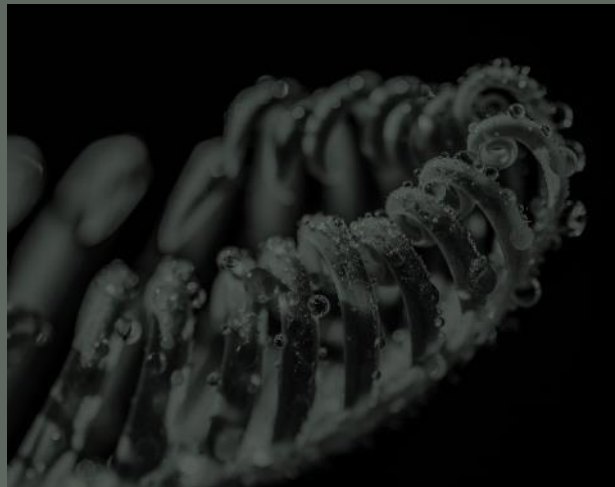

Ian Kellam, CADC
III

COO

Summary

At IRI, we believe that true innovation is required to solve today's problems. Although this presentation focused primarily on the Gaia Oasis program, we love discussing it in further detail and illuminating the connections to our other 7 programs within IRI. Other members of our team are located on our website!

Thank you
