### Our Mission as a Company in this World

Our Company has One Mission. We exist to serve SOUL – the Survival and Sustenance of Organized Human Life. We live in a world, in a time, when this is at stake, right now. This is big, bold, daring and demanding. It is no small or light mission, and it is one that demands full attention and cooperation from everyone in our organization and from those with whom we interact and serve, as a Company and as individuals.

We exist in order to respond in the most vigorous, potent way with essential and necessary solutions for challenges to society and civilization that are emerging through critical transformations happening now in our world. In order to accomplish our mission successfully, we must Serve Everyone in the Most Accurate and Sustainable Way. We do this using Science, Technology, Engineering, Mathematics, and Medicine. (“STEMM”) We do this as a Corporate Team and as Individuals.

Our Mission is to deliver the most optimal means for people as individuals, groups and institutions to achieve and sustain health and vitality, and through such, to attain and sustain wealth and affluence, and in all of this, meaningful purposeful living, all of this in an environment of instability, uncertainty and dramatic change. This is our fundamental mission and set of objectives. Our activities incorporate both products and services, employing information and knowledge technologies as well as instrumentation, both physical and digital.

This is why we have developed and refined our STEMM and our products – BioProt, MedAtrium, Eyrie, VESID and OASIS. This is why we have crafted each aspect of our business to fit this Mission. We knew what was coming, years ago. We studied, we learned, we made our mistakes, we corrected them, we built, we refined, and now we Deliver to You what our world needs.

Our Mission is bigger than all of us, within our Company and in the rest of our world. Unless we all pursue this together, in earnest, with vigor, with stamina, with the utmost potency, then we will all lose in what matters – our civilization, our lives, our cultures, our people, our families.
