

Our Strengths, Weaknesses, Opportunities and Threats

We have the best and most practical, versatile, extensible science and technology for what are among the absolutely most pressing needs in society.

They are robust and will bring on the next generation of technologies.

They are proven by actual use.

They are very economical, for everyone.

We need Visibility and with that, contracts and growth-support capital.

We need Champions in different market and public sectors.

We need more Top People who are truly “Can Do and Will Do without questions or doubts”

We have Working Answers and Solutions for the most serious public and personal health threat facing modern society since the time of the Black Death Plague of the Middle Ages

We have a Solution in the making for the most innovative answer to viral diseases since the discovery of vaccines and antibiotics

We have the most appropriate form of Intelligent, People-Serving Social Communications for the Global Society

We have fundamental scientific and technical advancements that are readily applicable to a multitude of problems in Energy, Environment, Agriculture, Medicine, and Space

We have limited time because the World is at risk of a major breakdown and socioeconomic collapse if precisely Our Solutions do not reach and spread worldwide.

Time is Against All of Us. The COVID-19 Pandemic is a precursor and a forewarning. Climate Change, Environmental Change, Energy and Agriculture Crises, and Asteroids comprise Major Threats to All of Humanity on Earth. We have Solutions that Work and Will Help Us All to Survive and Sustain.
