

Intelligence Renaissance Industries

in partnership with TETRAD Institute and New Horizons Consortium

Specialized Community Infrastructure Health and Safety Services and Programs

for Our Clients and Partners

Our management team can describe in detail the precise and proper adaptation and integration of what we do for the specific needs today and forthcoming for your organization. Our team, consisting of a precise blend of individuals with “STEM” experience combined with corporate, financial, and civic leadership, is quite unique in our society. You will recognize some names, certainly, but we do not operate much in the “media limelight”. You will appreciate this and other important facts about us.

Ultimately, what matters to you is to produce what is of critical importance to your, your peers and those for whom you are responsible. This is our foremost objective. We are available to schedule an appointment for meeting and discussing the most effective ways for you to make use of what we provide and deliver:

- ◆ Public and Consumer Confidence
- ◆ Distinction between Reliable and Unreliable Information
- ◆ Economic Adaptation and Sustainability
- ◆ Effective Measures and Protocols for Reduction of Epidemic Contagion and Infection
- ◆ Effective Measures and Protocols for Large-Scale Distribution of Resources including Medicines and Vaccines
- ◆ Countermeasures to Reduce Social Unrest and Instability
- ◆ Public Hygiene and Self-Care Education
- ◆ Public and Consumer Perception Enhancement

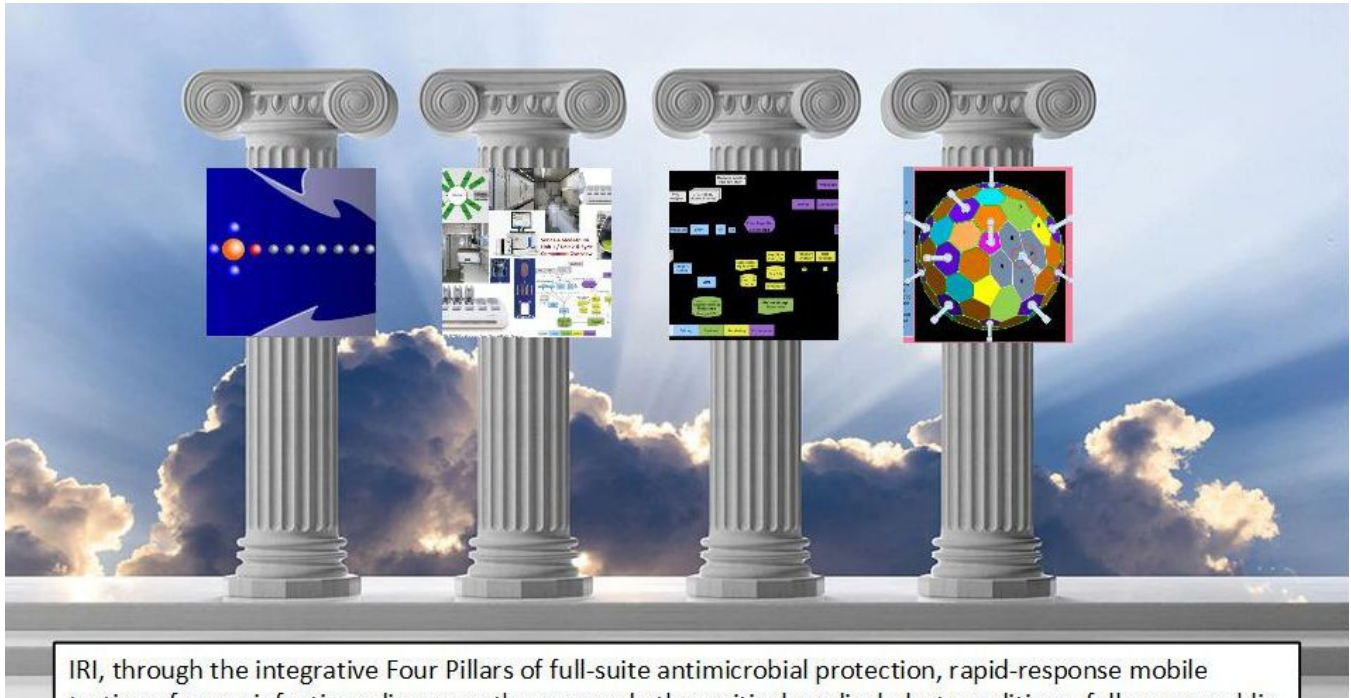

These constitute eight of the ways we work and what we deliver to You. Our tools are varied. They are empowered by our abilities as professionals with reliable networks of objective specialists in every relevant field of experience. Our formal tools include those which we bring, use, customize and apply to Your needs as individuals and organizations, including:

MedAtrium – mobile diagnostics, therapeutics, and education modules for any physical environment on Earth

BioProt – a component-suite of protocols and methods for ensuring reliable, long-duration antimicrobial bioprotection against known microbial agents including viruses

Eyrie – public-friendly, public-acceptable informatics for resource management and coordination of response

VESID – antiviral prophylactic medication that complements, strengthens and extends protection against respiratory/oral contagion by viruses including all variants of the COVID virus.

IRI, through the integrative Four Pillars of full-suite antimicrobial protection, rapid-response mobile testing of many infectious disease pathogens and other critical medical-alert conditions, fully open public health informatics (beyond mere “social distancing”) and VESID (the only such combined prophylactic + therapeutic for viral diseases), answers the needs of Communities, Countries, Peoples who have been hard-hit by COVID and who are at risk for other future and far-worse public-health socioeconomic threats due to complications and consequences of pre-existing conditions, comorbidities, insufficient resources,
